Profile

My name is Wiktor. I have been working as a graphic designer for three years. I mainly designed illustrations and outdoor and print advertising. In early 2020 I decided to expand my abilities and start learning front-end programming languages.

At first I had started studying myself and focused on the theoretical part, next I took 3-month course front-end Developer by Akademia 108, where I started to practice basic knowledge.

Now I am currently focused on continuously improving my skills by doing small projects using different technologies.

08.2020-in progress

I made the Social-App as part of the assignment during the course. The application has the ability to register (however, after registration, the data is not saved in the API), it is also possible to log in and log out. If you are not logged in, 10 posts of random users are displayed on the main page.
